

The Noregon JPRO® Fleet Service Kit includes the USB Data Link Adapter and one laptop pre-installed with JPRO® Fleet Service Portal and JPRO® Fleet Diagnostics!

JPRO® Fleet Service Portal Overview

JPRO® Fleet Service Portal provides a common, uniform interface for your existing OEM diagnostic software applications, launching them with the push of a button. It automatically searches your PC for all installed diagnostic applications, categorizes them by component, and automatically detects changes to installed applications.

JPRO® Fleet Service Kit with Laptop Contents

The Noregon JPRO® Fleet Service Kit includes the following:

- **Choice of Laptop:**
Panasonic Toughbook CF-30 (pictured),
Panasonic Toughbook CF-52,
DELL "RoadReady" laptop
- **JPRO® Fleet Service Portal**
- **JPRO® Fleet Diagnostics**
- **USB Data Link Adapter**
- USB DLA QuickStart guide
- USB DLA drivers
- USB interface cable
- 6 and 9-pin Y-cable

JPRO® Fleet Diagnostics Overview

JPRO® Fleet Diagnostics is a comprehensive vehicle diagnostics application that provides diagnostic and troubleshooting information about all components on the vehicle. It supports all heavy-duty fault codes and key data points and can automatically launch OEM's component diagnostics applications and troubleshooting manuals. Various views of the data such as a component list, fault list, data monitor and strip chart are displayed at the click of a button.
